PRESS RELEASE

FOR IMMEDIATE RELEASE

## Natoli Announces 2017 Technical Training Course Schedule

**ST. CHARLES, MO., U.S. (Oct. 13, 2016)** — *Space is limited* is a phrase you'll be hearing a lot more of in the coming months as Natoli Engineering rolls out its 2017 technical training course schedule, headlining: *Basics of Tablet Manufacturing and Troubleshooting*.

The dates for 2017 are:

**January 17-19**

**April 25-27**

**August 22-24**

**November 7-9**

For more than 20 years, Natoli's three-day courses have catered to anyone involved in the tablet compression industry, including pharmaceutical, veterinary, nutritional, confectionary and industrial markets. Primary beneficiaries are: tooling technicians, tablet press operators, tablet press maintenance technicians, QC/QA personnel, research and development and their supervisors.

Attendees will learn from veteran industry experts in both classroom and hands-on environments with plenty of opportunity for one-on-one time and Q&A.

### Course Takeaways

Enhancing knowledge of troubleshooting and maintenance procedures for tablet presses and tooling. Increasing understanding of TSM specifications and tooling options to reduce downtime by minimizing compression problems.

### Learning Objectives:

- Basics of tablet shapes & designs
- Tablet press setup and operation
- General background of tooling options and steel type
- Tool Inspection

-more-

- Formulation and granulation overview
- Introduction to Natoli's TM-II tool inspection system
- Hands-on tool and reworking & polishing
