Natoli Engineering Company Introduces Colored Tooling Storage Boxes

ST. CHARLES, MO., U.S. (Aug 7, 2017) — Natoli Engineering Company, Inc. continues to satisfy customer needs by announcing an exclusive addition to their Tablet Compression Accessories Catalog, red and black colored tooling storage boxes. Like their standard cream storage boxes, the new colored boxes are constructed of easy-to-clean, FDA compliant materials.

The new color options provide one of the easiest and safest ways to handle and store compression tooling, and make organizing tooling simple. Punches and dies can be stored together in sets, and molded keyways and guides prevent tool damage. Trays have drainage holes for water or excess oil to escape. An optional handle kit allows for ease of use in multiple applications such as ultrasonic cleaning systems.

The new colors offer additional benefits for companies looking to differentiate tooling:

- Easily identify clean and dirty tools
- Distinguish different sizes of tooling
- Keep tools for different products or presses separate

“We are excited about this new addition to our comprehensive Accessories Catalog...another example of how Natoli Engineering provides stellar customer service. We listen to our customers’ needs and strive to offer innovative, accessible and cost-effective solutions for the handling and storage issues that most tablet manufacturers face every day,” said Cory Terry, Parts and Catalog Manager at Natoli Engineering.

More About Our Toolboxes

Tooling storage boxes are specifically designed to eliminate mishandling and tool damage. Boxes contain an easy lift-out tray, grooved lids for easy stacking, and recessed handles to ensure secure handling. Removable tray allows interchanging of “B” and “D” tooling (533/328-45 and 533/328-33 also available in standard cream color).

Exterior Dimensions (LxWxH): 18x11x7 inches (457x279x178mm)
